

Optimize Your Operations

**with Fully Connected
Transportation Management**

Optimize Your Operations

3Gtms is a multimodal Transportation Management System (TMS) that optimizes transportation operations for shippers, brokers, and 3PLs.

Simplify each stage of your transportation process by leveraging 3Gtms' powerful yet intuitive solution. **3Gtms handles the most complicated projects, saving you both time and money in your daily operations.**

"3Gtms is an invaluable partner by helping us expand our reach and growth. The entire team's level of performance is rare among IT partners – and it's been a breath of fresh air."

- Thomas B. Crowley Jr,
Chairman & CEO, Crowley

Business Benefits:

- **Optimize all stages** of your transportation life cycle with an end-to-end TMS solution
- **Operate with a trusted partner** that's committed to delivering the best technology solution to meet your needs
- **Increase visibility** into expenses, available modes, load building, shipment status, and freight settlement details
- **Simplify rating, planning, and execution** with a modern-day optimization engine that selects and runs the most-effective shipping options
- **Save time and money** with streamlined processes, workflows, and system functionality

Leverage a Single Cloud-based Platform

“The ease of integration was the number one reason we chose 3Gtms. The experts at 3G built an integration hub that’s unbelievably reliable. And the faster we get integrated, the faster we save money and our customers start saving money.”

- Jeff Auslander
CEO, Dynamic Logistix

Manage your entire order-to-cash process by using a single cloud-based platform

- Real-time rating for parcel, LTL, and truckload provides accurate invoicing by factoring real costs like contract terms, fuel, accessorials, and more
- Planning capabilities consider all real-world constraints upfront to build the best load and consolidation options
- Execution and visibility tools provide different tendering options and transparency for shipment information and reporting
- Freight settlement functionality saves time on claim filing with automated workflows for data entry, information processing, freight auditing, blanket pricing, and more
- Single platform centralizes other business systems with integrations for order entry, ERPs, WMSs, EDIs, APIs, and customer technology
- Full suite of reports helps you manage and share information with stakeholders and partners
- Customer and Vendor Portals create clear lanes of communication and streamlined processes for vendors, carriers, and customers

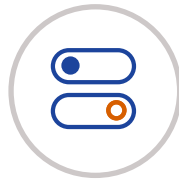

“Many TMS systems offer the same features and functionalities, but not the flexibility or usability that we found with the 3Gtms system. The choice wasn’t just based on how the TMS can serve us now; it comes down to how it can adapt to new complexities and grow with our business.”

- Michael Strickland
Director of Logistics, Corsicana Bedding

Experience A Different Kind of TMS

Gain a committed partner backed by high customer success, satisfaction, and retention

Leverage the ability to self-configure, freeing yourself from costly, long-term support contracts

Execute orders quicker with faster planning, optimizing, and tendering processes

Elevate your business with a TMS that grows with you, adapts to your needs, and invests in R&D to solve your challenges
